## NEW MEXICO SENTENCING COMMISSION

AMIR CHAPEL FALL 2016

# Estimated Number of Offenders in New Mexico Corrections Department Facilities in October Eligible for Controlled Release

This analysis by New Mexico Sentencing Commission (NMSC) staff is an estimate of the number of individuals in New Mexico Correction Department (NMCD) facilities who might be eligible for controlled release (1978 NMSA 33-9-5, Adult Community Corrections Act). Nine previous estimates have been published by the NMSC. The methodology we use to provide this estimate is identical to what has been used in the previous estimates.

The NMCD may place offenders who are within twelve -months of eligibility of parole in community-based settings, provided they have never been convicted of a felony offense involving a firearm. No other criteria have been established regarding eligibility for this type of controlled release program.

This analysis of offenders sentenced to prison in New Mexico and eligible for controlled release is derived from information provided to the New Mexico Sentencing Commission by the New Mexico Corrections Department. At the request of the NMSC, NMCD staff provided several different *Microsoft Excel* files that contain information on offenders released by calendar year, offenders admitted by calendar year, and offenders confined on a particular day. The information reported here comes from the confined file, which contains information on 7,118 inmates who were confined on June 30<sup>th</sup>, 2016.

The file contained a number of variables for each offender including their projected release date (release date assuming all future earned-time will be awarded), their flat time release date (this field represents the absolute latest day the offender will be released), the most serious charge (this field describes the most serious offense the offender is currently serving, even if it is not his/her longest sentence), the type of offender (parole violator technical, parole violator new charge, probation violator technical, probation violator new charge, new court commitment, escapee returned, etc.), final custody level (this field represents the offender custody level placement after overrides), and earned type class (this field represents the number of earned time days per month the offender is eligible to receive).

## The New Mexico Corrections Department provided the following response to this analysis:

"In the face of a growing inmate population and limited resources, but through the lens of true public safety, the Department will remain open to all reasonable options for the transition of offenders back into the community. Based upon review of current options relating to the Department's authority under the controlled release statute, any such release at this time is not reasonable or realistic for three significant reasons.

First, while the Department continues to move forward with its efforts to implement a global risk and needs assessment for its offenders for better assessing and programming offenders remanded, by the courts to its custody and control, the Department's efforts in this regard have unfortunately not yet been funded by the New Mexico Legislature. To best inform its decisions relative to the most recent and relevant science available, the Department will require a more comprehensive screening and approval process to guide its judgment in balancing the release of candidates with its public safety mission.

Second, New Mexico has grown to recognize its inadequate transitional support and community based treatment infrastructure for offenders completing their prison sentences and returning to our communities. Specifically, the state lacks the statewide availability of drug/alcohol treatment, transitional living centers, and half-way houses to aid in the safe transition of all offenders, to include but not limited to those controlled release offenders outlined in the study. Accordingly, releasing these offenders abruptly and directly to the streets of New Mexico is not in the best interests of public safety, the state's economy, or the offenders themselves.

Finally, it is important to remember that offenders within twelve months of eligibility of parole, who are eligible for Community Corrections controlled (early) release, are still serving the last year of their original sentence as ordered by New Mexico judges. While judges have complete judicial immunity for their decisions and actions, the law provides no such immunity or protection to the Corrections Department for its early release decisions. As stewards of the state's resources, and given the potential impact of our current lack of a more comprehensive risk and needs assessment coupled with the state's current inadequate community based programming and treatment infrastructure, exposing the state to greater litigation via the controlled release statute would not appear to be reasonable.

In closing, while the law gives the Department the authority to release certain offenders, the Department will not arbitrarily exercise its authority in a vacuum. The Department instead must and will continue to reasonably manage its facilities and offenders through the lens of public safety."

A complete list of variables and descriptions are provided in Attachment A.

Our estimate of the number of individuals eligible for controlled release is based on a number of variables included in the NMCD dataset. The estimate was created using the projected release date, the final custody level, the admission type, and the most serious charge on which the offender was being held.

In our review of the dataset we discovered 304 offenders (4.3%) were missing a projected release date and flat time release. We excluded all cases that were missing these data. The sample provided in this brief report includes 6,814 offenders (95.7%) of the 7,118 offenders in the confined dataset.

After removing offenders with missing projected release dates we removed offenders who did not have a projected release date between October 1, 2016 and September 30, 2017. This was done in order to only include offenders who had a projected release date that was approximately 12 months from the date of this publication. This yielded a sample that included 2,492 offenders.

We then subtracted offenders who were serving time (defined as their most serious offense) as a violent offender (1,025 offenders)<sup>2</sup>, a sex offender (137 offenders), a DWI offender (102 offenders) or who were serving time on a drug trafficking offense (412 offenders). We also subtracted an additional offender who did not have an offense description or statute associated with their admission into prison. This yielded a sample that included 816 offenders.

Next, we subtracted offenders who had a final Level III custody assignment, Level IV custody assignment,

or were missing a final custody level (404 offenders).<sup>3</sup> We only included offenders with a Level I final custody assignment or Level II final custody assignment, which with the other subtractions leaves a sample of 412 offenders.

The NMCD places offenders in security levels and assignment to these security levels is based upon eligibility criteria. Level I custody assignment indicates an ability to function appropriately among staff and other inmates without the need for constant supervision or a security perimeter. A Level II custody assignment indicates the ability to function appropriately and productively among staff and other inmates in a dormitory setting without presenting a significant risk to the safe, secure and orderly operation of the institution. Level III and Level IV custody assignment levels include offenders who do not meet the criteria of Level I and Level II, and typically consists of offenders with more serious offenses and those that might pose a threat to the safety of other inmates and staff.

While the section of law defining the eligibility criteria for controlled release does not expressly exclude violent offenders, sex offenders, offenders convicted of drug trafficking or offenders in higher custody level assignments, we believed it was prudent to exclude them from consideration in this analysis. Following an initial review by NMCD staff it was decided to also exclude DWI offenders. If directed, we could limit or increase the eligibility criteria and conduct additional analyses.

Finally, we removed all offenders (80) who had an admission type into prison that noted they were serving time on a parole revocation or were awaiting a parole revocation hearing.<sup>4</sup> By deleting these offenders from the file, we were left with a total of 332 offenders that

Total	27	100	42	100	69	100

were eligible for controlled release between the dates of October 1, 2016 and September 30, 2017.

**Table 1** provides the number of offenders eligible for controlled release by type of offense and custody level assignment.

Our estimate using NMCD data suggests that between October 1, 2016, and September 30, 2017, 81 nonviolent offenders with a Level 1 final custody assignment will be eligible for controlled release. A further 251 non-violent offenders with a Level II final custody assignment had a projected release that would make them eligible for controlled release. In total, 332 offenders met the initial criteria we used for this analysis. The majority of these offenders are male (79.2%). Individuals serving time on a drug possession conviction comprised the largest group followed by burglary convictions and fraud convictions.

**Table 2** provides the number of female offenders eligible for controlled release by type of offense and custody level assignment.

Our estimate suggests that between October 1, 2016, and September 30, 2017, 27 female non-violent offenders with a Level 1 final custody assignment will be eligible for controlled release. A further 42 female non-violent offenders with a Level II final custody assignment had a projected release that would make them eligible for controlled release. In total, 69 female offenders met the criteria we used for this analysis.

**Table 3** provides the number of male offenders eligible for controlled release by type of offense and custody level assignment.

Our estimate suggests that between October 1, 2016, and September 30, 2017, 54 male non-violent offenders with a Level 1 final custody will be eligible for controlled release.

Table 3. Estimated Number of Male Offenders Eligible for Controlled Release						
Type of Offense	Final Custody Level Assignment					
	Level I		Level II		Levels I & II	
	Count	Percent	Count	Percent	Count	Percent
Other Offenses	0	0	2	1.0	2	0.8

Judicial Interference	2	3.7	9	4.3	11	4.2
Drug Possession	16	29.6	81	38.8	97	36.9
Other Property Offenses	2	3.7	8	3.8	10	3.8
Stolen Property	2	3.7	6	2.9	8	3.0
Fraud	8	14.8	15	7.2	23	8.7
Arson	1	1.9	2	1.0	3	1.1
Motor Vehicle Theft	2	3.7	4	1.9	6	2.3
Larceny Theft	6	11.1	33	15.8	39	14.8
Burglary	15	27.8	44	21.1	59	22.5
Total	54	100	209	100	263	100

A further 209 male non-violent offenders with a Level II final custody assignment had a projected release that would make them eligible for controlled release. In total, 263 male offenders met the criteria we used for this analysis.

The statutory criteria established for this program notes that offenders convicted of a felony offense involving the use of a firearm are not eligible for controlled release. We are not able to estimate how many individuals this might exclude. Given additional time and drawing upon national literature and discussions with individuals knowledgeable about this population, including NMCD staff, we could provide an estimate and include this in our calculations. NMCD staff also pointed out they would exclude offenders on detainers, offenders serving consecutive sentences, and offenders who had recent and/or major misconduct reports. At this time, we are unable to estimate how many offenders are serving consecutive sentences or who have had a recent and/or major misconduct reports. However, one recent estimate suggests that approximately 25% of current offenders are on some sort of detainer. If the total number of offenders who are eligible for controlled release (332) is reduced by 25%, the result is a total of 249 who may be eligible for controlled release. Additionally, using this technique, it is estimated that the female offenders' (69) eligible for controlled release is reduced to about 52 female offenders. Whereas, the total estimated male offenders (263) are reduced to 197 male offenders that are eligible for controlled release.

This estimate should be viewed as preliminary. These numbers would likely be reduced if those serving consecutive sentences, with misconduct reports, and who have committed a crime involving firearms were removed from the sample. Discussions with NMCD staff could be useful in further refining the estimate.

In addition to the above analysis, this report includes two additional analyses presented in Appendix 1 and 2. In the first appendix, we present the total number of estimated inmates eligible for controlled release over time. In the second appendix, we present the time served and time until projected release for inmates estimated to be eligible for controlled release.

may explain why some offenders are missing a projected release date including: the housing of interstate compact offenders who are serving sentences for other states, but whose release dates are not tracked by NMCD, inmates serving life sentences who do not have either a projected release date or a flat time release date, and those inmates sentenced prior to July 1, 1979 under the indeterminate sentencing laws (many are parole violators) who do not have a projected release date.

- 2. Consisting of 1,025 Serious Violent Offenders as labeled by NMCD, 37 offenders with weapons charges, 170 with other violent offenses, 100 charged with assault, 310 charged with battery, 55 charged with robbery, 89 charged with homicide, 134 charged with armed robbery, 82 charged with kidnapping, and 48 charged with 'other homicide'.
- 3. Consisting of 72 Level IV offenders and 308 Level III offenders. Additionally, 24 offenders with no final custody level were deleted.
- 4. We removed all offenders with the following admission type as labeled by NMCD in CMIS: 'Parole Viol Abscond' (34 offenders), 'Parole Viol Pnd Chrg' (10 offenders), 'Parole Viol Tech' (31 offenders), and 'Probation Violation Tech' (5 offender).

#### **FOOTNOTES**

1. In a review of the study, the New Mexico Corrections Department noted several reasons that
